

## **E-commerce Website App Overview**

The E-commerce Website App is a platform where users can both buy and sell products. The app provides a simple and intuitive interface for managing accounts, listing products, browsing items, and making secure purchases. The main goal is to facilitate an easy shopping experience for customers while giving sellers a platform to reach buyers.

### **Key Features:**

#### **1. User Login and Signup**

- Users must create an account or log in to access personalized features.

#### **2. Buyer Functionality: Product Browsing and Search**

- Buyers can browse products by categories (e.g., electronics, clothing, etc.) or use a search feature to find specific products.

#### **3. Add to Cart**

- Buyers can add multiple products to their shopping cart and they can purchase the order.

#### **4. Order History**

- Users can view their past purchases, including product details, prices, and transaction status.

If I have more time then I will add Extra Features such as

### **Seller Functionality: Product Listings**

**Sellers can list products for sale, providing details such as:**

- **Product Title**
- **Product Description**
- **Price**
- **Product Images**
